Franco Andrés Gaido

Senior Full Stack Software Developer | .NET + Angular

francogaido2014@gmail.com | +54 3562 415598 | Córdoba, Argentina | linkedin.com/in/franco-gaido

PROFESSIONAL SUMMARY

Senior Full Stack Software Developer with 6+ years of experience designing, developing, and deploying production-grade web and desktop applications. Specialized in .NET (Framework / Core / .NET 8) and Angular (2+/14/18), with strong expertise in Clean Architecture, CQRS, MediatR, and Dapper. Experienced integrating relational (Oracle, PostgreSQL) and non-relational (MongoDB) databases, managing IIS deployments, and building CI/CD pipelines with Azure DevOps. Beyond corporate experience, independently designed and built CentralTurnos, a self-owned end-to-end SaaS platform, demonstrating technical leadership, product architecture skills, and full ownership of the software lifecycle.

WORK EXPERIENCE

.NET / Angular Software Developer | ITR

Remote – Buenos Aires Province, Argentina • May 2023 – Present

- Develop and maintain 7 production projects for Trenes Argentinos (Argentine Railways) as part of a small 2-4 developer agile team, applying Clean Architecture and CQRS with MediatR.
- Oracle database integration exclusively via stored procedures (no ORM), ensuring high-performance queries in critical production environments.
- Build and maintain CI/CD pipelines in Azure DevOps with automated deployments to IIS on Windows Server.
- Developed a .NET Core console tool for production data migration, normalizing unstructured legacy files.
- Collaborate directly with DBA and end client on requirements refinement and production incident resolution.

Full Stack Software Developer | Bitsion

Córdoba, Argentina • March 2020 – April 2023

- Contributed to tucarpeta.com, a SaaS document management platform used by Claro across Argentina, Uruguay, and Paraguay (3+ countries).
- Worked in a 12-person Agile Scrum team (8 developers, 2 analysts, 2 QA testers), delivering features continuously in 2-week sprints.
- Full stack, end-to-end development using .NET Framework 4.7, MongoDB, Angular 2+/AngularJS, Ionic 3/4, and TypeScript.
- Reduced technical onboarding time for the team by writing internal documentation for reusable Angular components.

Systems Developer (Internship) | Cooperativa de Servicios Públicos

Morteros, Córdoba, Argentina • September 2019 – November 2019

- Developed CRUD modules for the organization's internal management system using PHP, Bootstrap, and JavaScript.

PERSONAL PROJECT

Founder & Full Stack Developer (sole technical owner) | CentralTurnos

Independent project • 2024 – Present

- Designed and built, single-handedly, an end-to-end SaaS platform for padel club management and court reservations, using .NET 8 (backend) + Angular (frontend) + PostgreSQL (database), deployed on a self-managed VPS.

- Designed the full subscription architecture: a 3-tier plan matrix (Free / Club / Pro) backed by a 21-key entitlement catalog for granular, permission-based access control.
- Integrated a WhatsApp bot (Evolution API) for booking notifications, with dual monthly and hourly rate limits to control operating costs.
- Functional, validated product currently in pilot testing with 1-2 real padel clubs.
- Currently building a responsive version of the dashboard for mobile use.

EDUCATION

Higher Technician in Software Development

Instituto María Justa Moyano de Ezpeleta | 2017 – 2019

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, PHP, LINQ, SQL

Frameworks & Libraries: .NET 8 / .NET Core / .NET Framework, Angular (2+/14/18), AngularJS, Ionic 3/4, MediatR, Dapper

Architecture & Patterns: Clean Architecture, CQRS, Dependency Injection, Repository Pattern, Design Patterns, Subscription & entitlement system design

Databases: PostgreSQL, Oracle (stored procedures), MongoDB, Entity Framework Core

DevOps & Tools: Azure DevOps, Git, Docker, CI/CD Pipelines, IIS, Windows Server, VPS / server administration

Other: REST APIs, Swagger/OpenAPI, Bootstrap, Watchdogs, WhatsApp Bot (Evolution API), Mercado Pago API

SOFT SKILLS

Technical leadership & autonomy | Proactivity | Teamwork | Continuous learning | Stakeholder communication | Attention to detail | Problem solving

LANGUAGES

Spanish: Native | English: Basic — solid technical reading comprehension (documentation, GitHub, Stack Overflow); spoken communication still developing.
